FY 2019-2020 BUDGET WORKSHOP INFORMATION TECHNOLOGY – Workforce Costs by Position

Reports > 6. Workforce Report (GRID VERSION)

INFORMATION TECHNOLOGY DEPARTMENT 150

DEPARTMENTAL (or Division) OVERVIEW

The Mono County IT Department is a Tier 2 - Essential Services department which provides the core technology, data, and communications infrastructure for Mono County and the Town of Mammoth Lakes. The Department is comprised of 12.5FTE employees who are spread between three business lines: Infrastructure, Services, and Geographic Information Systems. In addition to the core IT services which are provided to our users, the IT Department is responsible for management of the Radio & Communications Division (151), as well as oversight for the Tech Refresh Program Internal Services Fund (653).

PROGRAMS AND SERVICES

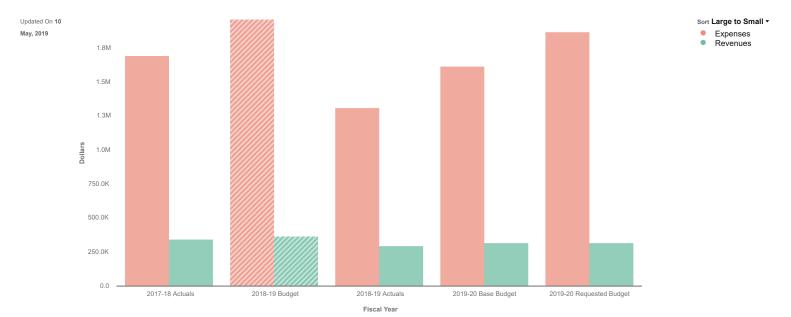

Our staff manages and maintains over 75 servers, on three networks with all complementary technology (including routers, firewalls, switches, and data storage devices) across 40 different sites in order to deliver high quality computing services and support communication needs for our staff. In addition to the primary Town and County networks, we maintain all aspects of the Mono County Sheriff Department and Mammoth Lakes Police Department. Additionally, the IT Department oversees the development and maintenance of the County & Town's Federated Geographic Information System, including implementation and maintenance of hardware and software, application development, maintenance of nearly one hundred data sets, and end-user support.

The Fiscal Year 2019-2020 is based on the 2019 IT Strategic Plan which was adopted by the Mono County Board of Supervisors on February 19, 2019 and is focused on our Mission to "Empower our community by providing exceptional technology and customer service."

DESCRIBE WHAT IS NOT INCLUDED IN THIS BUDGET

This budget is inclusive of all *core* Information Technology departmental expenses. Enterprise/organizational technology expenses are in the Tech Refresh budget.

INFORMATION TECHNOLOGY RADIO & COMMUNICATIONS DEPARTMENT 151

DEPARTMENTAL (or Division) OVERVIEW

The Mono County IT Department is a Tier 2 - Essential Services department which provides the core technology, data, and communications infrastructure for Mono County and the Town of Mammoth Lakes. The Department is comprised of 12.5FTE employees who are spread between three business lines: Infrastructure, Services, and Geographic Information Systems. In addition to the core IT services which are provided to our users, the IT Department is responsible for management of the Radio & Communications Division (151), as well as oversight for the Tech Refresh Program Internal Services Fund (653).

The IT Department is focused on innovation and determined to deliver modern technologic solutions in a creative and cost-effective manner within all areas we support. We are determined to find ways to collaborate with other jurisdictions to improve service delivery, find more efficient ways of doing business, and minimize departmental overhead in terms of both staff and infrastructure costs.

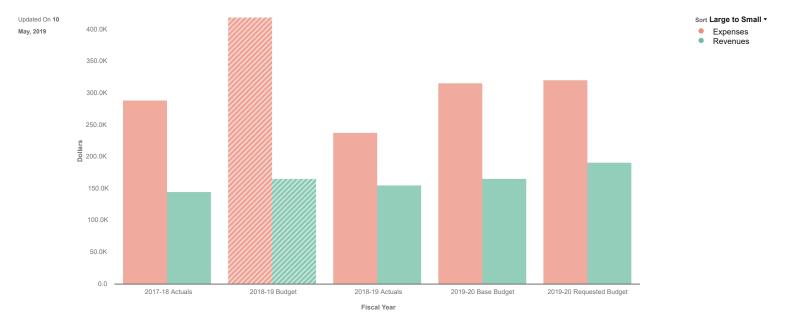

PROGRAMS AND SERVICES

Our staff manages and maintains over 75 servers, on three networks with all complementary technology (including routers, firewalls, switches, and data storage devices) across 40 different sites in order to deliver high quality computing services and support communication needs for our staff. In addition to the primary Town and County networks, we maintain all aspects of the Mono County Sheriff Department and Mammoth Lakes Police Department. Additionally, the IT Department oversees the development and maintenance of the County & Town's Federated Geographic Information System, including implementation and maintenance of hardware and software, application development, maintenance of nearly one hundred data sets, and end-user support.

DESCRIBE WHAT IS NOT INCLUDED IN THIS BUDGET

The IT Department budget was modified for FY 2018-2019 to move 'Enterprise Software' expenses into the Tech Refresh ISF and charge a fixed rate back to all users based on actual cost. This transition reduces the overall Cost Plan charges for departments and allows for full cost-recovery and transparency in the fiscal year they are realized.

INFORMATION TECHNOLOGY TECH REFRESH / INFRASTRUCTURE REPLACEMENT PROGRAM FUND 653

DEPARTMENTAL (or Division) OVERVIEW

The Technology Refresh/Infrastructure Replacement Program (IRP) is a technology-dedicated Internal Services Fund (ISF) which was established in 2014 to ensure that equipment (including desktop PCs, back-office infrastructure, and enterprise software) could be maintained and replaced efficiently as it reached end of life. The Mono County Information Technology Department is responsible for the oversight and management of this fund, which is contributed to annually by each department based on the number of PCs and users which they have in service.

PROGRAMS AND SERVICES

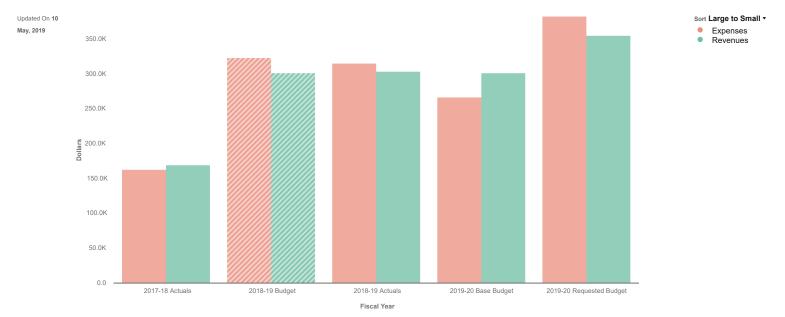

For FY 2018-2019 the Tech Refresh ISF includes the following:

- 1. PC replacement funds based on the type of machine (desktop or laptop) and an anticipated fouryear replacement cycle
- 2. Microsoft Office 365 costs based on the type of licenses needed for each user in each department
- 2. Replacement funds for 'back office' infrastructure (including servers, storage, batteries, etc.) which is charged on a per user basis
- 4. Enterprise communication equipment including networking, video conferencing equipment, and a 10y payback of the County's new phone system.
- 5. Enterprise software used by the entire organization, or by the IT Department to manage the entire organization (this is new for this FY, and was previously included in the IT budget and charged back to departments through the Cost Plan).

DESCRIBE WHAT IS NOT INCLUDED IN THIS BUDGET

The Tech Refresh ISF still does not include the communication costs for the organization (internet, dialtone phone service, network costs) – those remain in the IT Department (150) budget for FY 19-20 and will be charged back through the Cost Plan.
