NUMBER	TYPE of Notice	TITLE and DESCRIPTION	DATE POSTED
MC 24-001	NOD	Apogee Farms (commercial cannabis cultivation) The Project proposes a GPA to change the land use designation of two parcels (APN 025-020-013 and 025-040-002) from “Rural Residential” to “Specific Plan” and a specific plan (SP) to construct and operate a commercial cannabis production, processing, and distribution facility at 23555 Highway 6 (APN 025-020-013), with the owner/operator living on site. The SP would establish permitted land uses and required development standards, and incorporate a Conditional Use Permit for commercial cannabis and an overhead utility line. Commercial cannabis totaling 8,640 square feet would be cultivated on site starting outdoors and then transitioning into three greenhouses. Greenhouses would be equipped with light-emitting diodes (LED) for supplemental light and automatic black-out curtains to prevent light leakage from dusk to dawn. A facility on-site would be used for processing and packaging the cannabis. The business would then distribute product to off-site retailers. A Mitigated Negative Declaration was certified for the project and a Mitigation, Monitoring and Reporting Plan was adopted.	01/23/2024

MC 24-005	NOE	Mono Basin Temporary Urgency Change Petition June-July 2024 A Temporary Urgency Change Petition is requested to change operations in the Mono Basin from June 17, 2024 through July 3, 2024 (17 days). LADWP Operations will deviate from the flow requirements of Amended Licenses 10191 and 10192, due to an operational limitation on flows which can	03/28/2024

		be released safely. Specifically, malfunction of the Grant Lake outlet valve is leading to cavitation in an unsafe manner above 175 cubic feet per second (cfs), which cannot be remediated prior to the requested change date. Cavitation, the rapid collapse of a bubble or void, pits metal and causes heavy vibration leading to substantial wear and tear on valves and pipes which can lead to equipment failure over an extended period of time. Therefore, safe release of flows under 175 cfs is being requested. The total volume of flow over the snowmelt period will not be modified with this request. The Mono Basin Stream Monitoring Team determined that this Petition for Change, if approved, will not result an impact on fish, wildlife or instream uses.
