BI-STATE SAGE-GROUSE WORKDAYS

Join Eastern Sierra Land Trust and the Bureau of Land Management as we team up to improve Bi-State sage-grouse habitat. On August 22nd and 23rd from 9am-12pm, we will be removing conifer seedlings that are invading sagebrush habitat near Bridgeport. These trees provide perches for predators that prey on sage-grouse eggs and chicks.

Coffee and pastries will be provided. Bring a hat, closed-toe shoes, sunscreen, a camera, and water; please leave pets at home.

TO VOLUNTEER CONTACT: ryan@eslt.org or (760)873-4554

Directions: Meet at the intersection of Green Creek Rd and Hwy 395. From Bishop, the turnoff is roughly 20 minutes north of Lee Vining and 10 minutes south of Bridgeport.
