

My name is Ed Parkinson I've lived in Benton and the Tri valley area since 1965. I am interested in serving on the Tri Valley Groundwater Management District Advisory Board. My entire family has been involved in the growth and development of the Benton area for over 50 years. I am very concerned about the area, the water usage and some of the ideologies that people have in mind for our rural area. I would like to see an equitable and sustainable future for our area and for all of its citizens, in particular the water usage and future development of the area. I choose to live in this area because I truly enjoy what it has to offer and the beauty and advantages this unique area of California has to offer us. Thank you for your consideration and opportunity to potentially serve on this Advisory Board with the hope of preserving the historic values and features these priceless valleys have to offer.

Sincerely,

Edward H Parkinson
